

Welcome to ShareTown!

We are an innovation
foundation.

We back new ideas to
tackle the big challenges
of our time.

Our priority fields of work

The Collaborative Economy:

“When we share we all have access to more”

- The world is full of underutilised resources (time, skills, money, things)
- Internet enables efficient connections between distributed networks of people and/or things
- Matches people who need something with those who can meet that need

Platform capitalism:

3 major impacts

1. Broken social contract between workers and businesses
2. Exacerbation of existing systemic inequalities
3. Surveillance capitalism – use of data to monetise peoples' lives

How do we
disrupt the
disrupters?

1

WHAT THEY DO

What does the platform do?
Who does it benefit?

2

HOW THEY DO IT

Who owns the platform?
Who decides how it works?

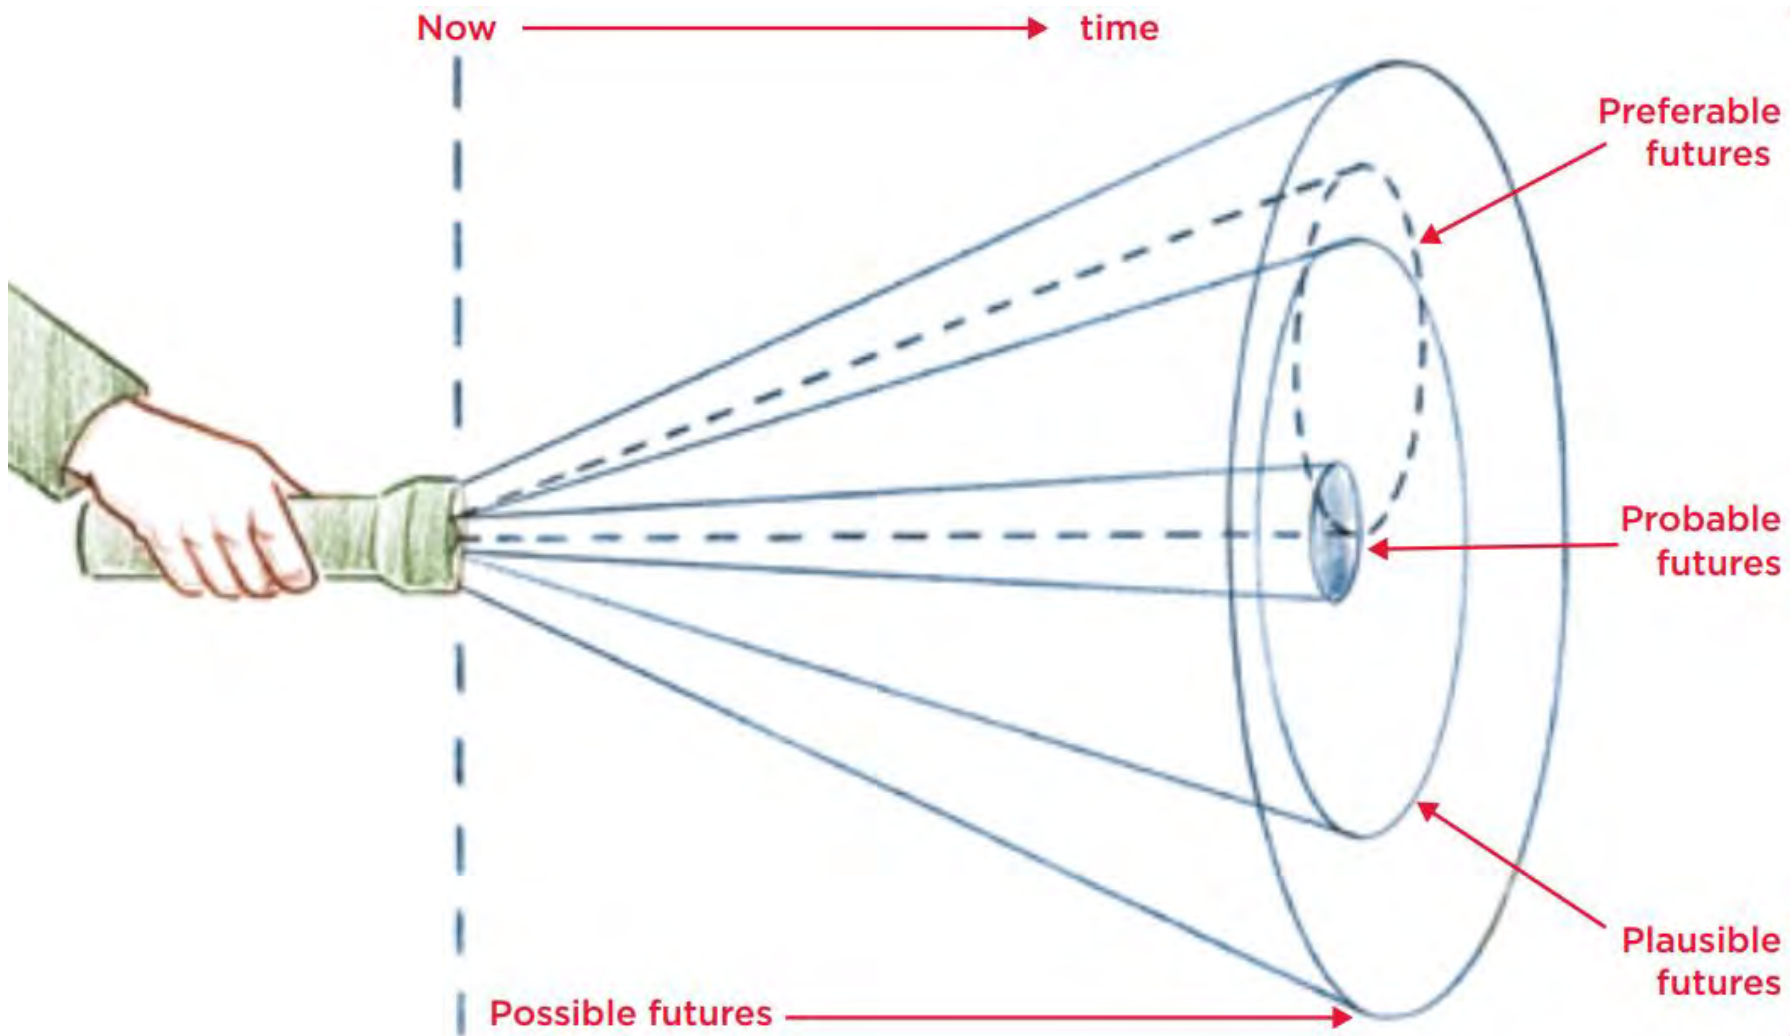

“The future is the ultimate public space, something we all have a stake in & seek to be part of”

Annette Mees, Theatre-maker

“To be truly radical is to
make hope possible, rather
than despair convincing”

Raymond Williams, Resources of Hope

What next for ShareTown?

Thank you!
